EDUCATION

B.Tech in Computer Science and Engineering

2023 – 2027

VIT Bhopal University | CGPA: 9.03 / 10.0

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java, SQL, HTML, CSS
- **Developer Tools & Technologies:** React.js, Node.js, Socket.IO, Git, GitHub, MySQL, SQLite, Vercel, REST APIs, Object-Oriented Programming, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Software / AI Intern

Feb 2025 – Oct 2025

Koach | Remote

- Designed and developed scalable RESTful backend APIs using Node.js and Express.js as part of a lean 4-person engineering team, building core service endpoints for AI-driven product features.
- Collaborated closely with fellow engineers in a fast-paced startup environment, owning backend architecture decisions across multiple feature modules.
- Optimized API response handling and error-resilience, improving development velocity for the small team.

PROJECTS

OneLink.bio – AI-Powered Link-in-Bio Platform — React.js (TypeScript/TSX), Node.js, SQLite

2025 – Present

Live: onelink-bio-pi.vercel.app

- Engineered a full-stack platform spanning 3 modules — customizable profile links, AI-driven content suggestions, and an anonymous Q&A feature (NGL-style) — extending beyond Linktree's standard functionality.
- Built a Node.js backend with SQLite for persistent data storage; designed a clean, responsive UI with React.js and TypeScript (TSX) to improve navigation and accessibility.
- Actively maintained and iterated on the platform since 2025, continuously adding AI-personalization features.

EverLink – Real-Time Watch & Chat Platform — Node.js, Socket.IO

Jan – Feb 2025

- Solved fragmented remote social viewing by architecting a watch-party platform unifying 6 features — live video sync, group chat, voice notes, a shared whiteboard, an AI assistant, and real-time translation — in one app.
- Won 3 sponsored hackathon tracks — YCW, Wolfram, and Chess.com — at HarvestHacks 2025 (National Level).

Shramsetu – Rural Employment Platform — HTML, CSS, JavaScript

Oct – Nov 2024

- Tackled rural unemployment and job-access barriers with a job-matching platform connecting two user roles — workers and employers — via a streamlined workflow.
- Earned Top 10 Finalist honors at the GDSC Hackathon (University Level) for real-world impact and technical execution.

SlidesCraft – Presentation Generator — Python, python-pptx, NLP

Nov – Dec 2023

- Eliminated the time-consuming manual process of building slide decks with a 3-stage AI pipeline (topic research, NLP summarization, slide assembly) that auto-generates ready-to-use PowerPoint decks from Wikipedia content in 5–10 seconds.
- Condensed a typically multi-hour manual workflow into one automated pipeline, winning the People's Choice Award at CivicHacks 2023 (National Level).

HACKATHON ACHIEVEMENTS

- **HarvestHacks 2025 — Winner, 3 Tracks:** National Level — secured the YCW, Wolfram, and Chess.com sponsored tracks for EverLink.
- **CivicHacks 2023 — People's Choice Award:** National Level — honored for SlidesCraft, an instant presentation generator.
- **GDSC Hackathon 2024 — Top 10 Finalist:** University Level — selected among top projects for the Shramsetu employment platform.

INTERESTS

Chess and Cricket — leading wicket-taker in major cricket tournaments at the inter-school and district-level championships.
